-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-9 and 14-22, drawn to fuser and fuser station, classified in class 399, subclass 320.
 - II. Claims 10-13, drawn to method for nip width control, classified in class 399, subclass 67.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as apparatus and method of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the method for using the apparatus as claimed can be practiced with another materially different product or (2) the apparatus as claimed can be used in a materially different method of using that apparatus (MPEP § 806.05(h)). In the instant case, the Invention I requires a fuser member that includes one or more layers of a silicone material, the pressure member being a pressure roll not required by Invention II, while Invention II requires monitoring a velocity of the pressure member, or fuser or media, not required by Invention I.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art cited in the PTO-892 and not mentioned above disclose related devices and methods.
